1. Introduction

PCB Version

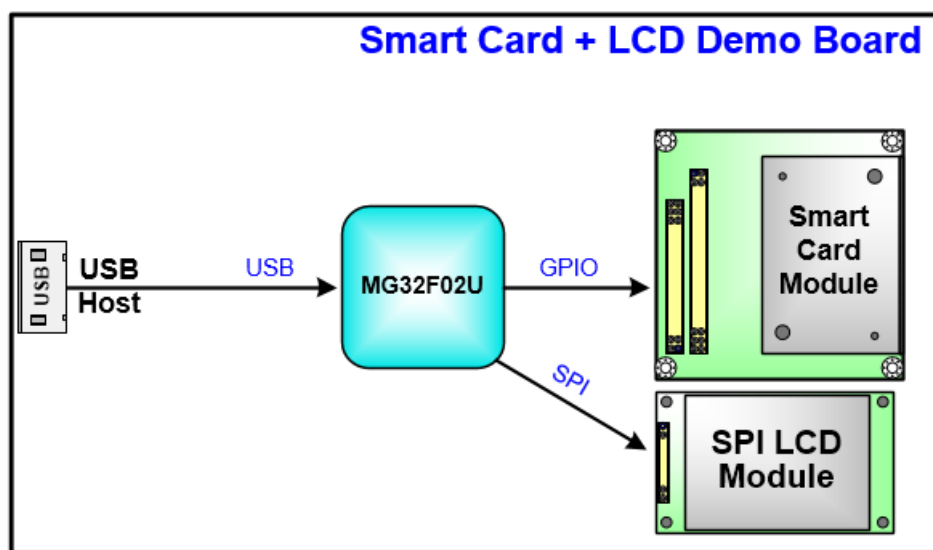

MG04-04A(MG32F02U_LCD)

DB01-06(SMART_CARD)

Features

1. SPI LCD Display: Display picture on 240x320 LCD through SPI interface.
2. Smart Card: Smart Card Module.

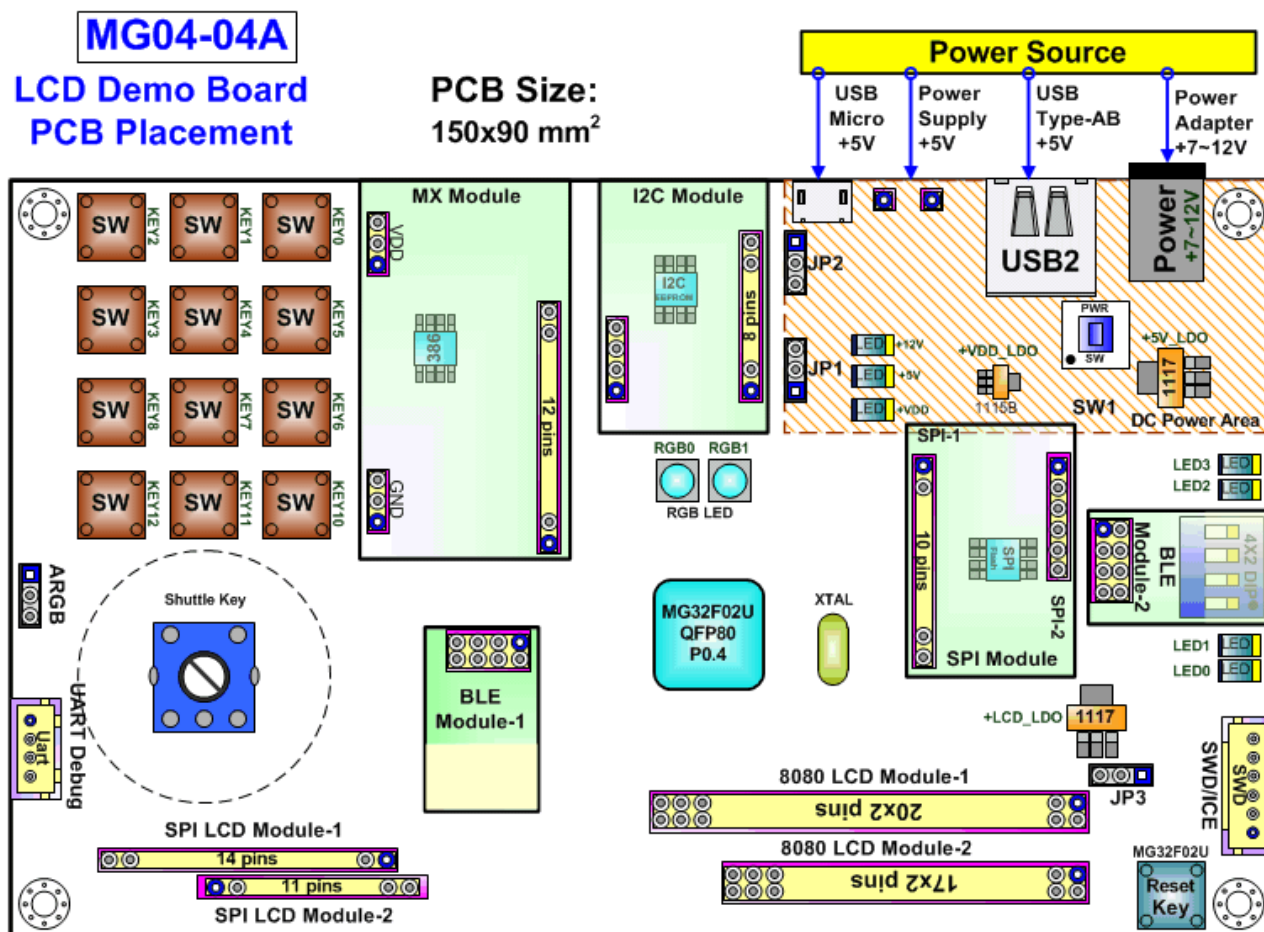

System Block

PCB Placement and Function Block Diagram

PCB Outline and Options

◆ DC Input Power Source

User can input +5 volt DC power to the Micro USB connector, the optional A/B-type USB connector from external USB power source or on board +5V/GND connection holes from external power supply. The push button SW1 is used to turn on/off the input DC +5V power.

These is one optional +7~12 volt DC input to the DC power jack from external power adapter. The input +7~12 volt DC power can also generate the +5 volt DC power by through the optional +5V_LDO power regulator.

◆ SWD Connector

User can connect the MG32F02U128 MCU to the external SWD controller or debug ICE by through the SWD connector.

◆ UART Connector

User can connect the MG32F02U128 MCU to the external UART controller or PC COM port by through the UART Debug connector.

◆ JP1 : I2C module power option

Pin-1,2 short : +VDD (+VDD LDO power regulator)

Pin-2,3 short : +5V

◆ JP2 : MX module power option

Pin-1,2 short : +VDD (+VDD LDO power regulator)

Pin-2,3 short : +5V

◆ JP3 : LCD module power option

Pin-1,2 short : +5V

Pin-2,3 short : +LCD_LDO (1117 LDO power regulator)

Module Board and Components

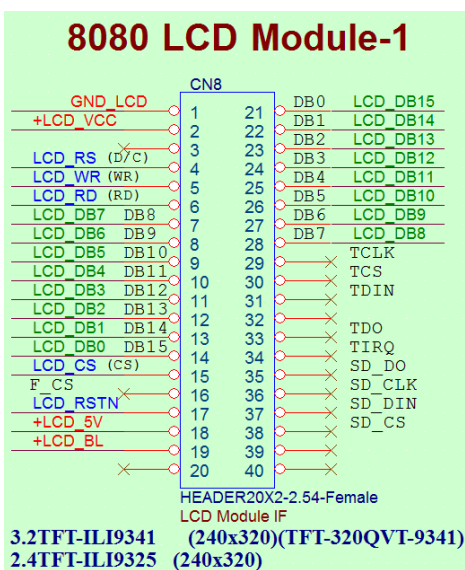

1. MG32F02U128 : 32-Bit CM0 MCU with USB/UART/SPI/I2C/8080-LCD interfaces

Smart Card Module : DB01-06(SMART_CARD)

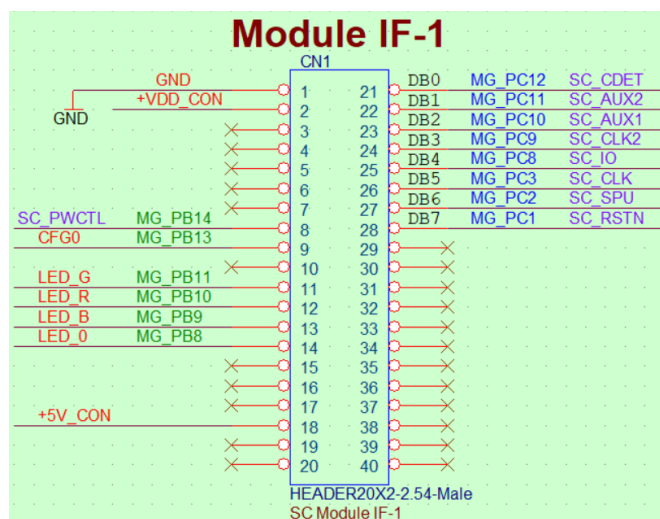

Smart Card Module

Dock the DB01-06 board CN1 on the CN8 connector (Display LCD with 8080 interface) of MG04-04A board

MG04-04A CN8

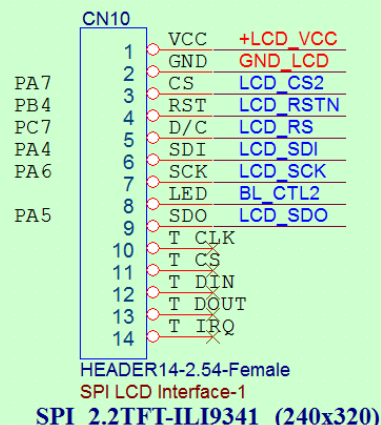

DB01-06 CN1

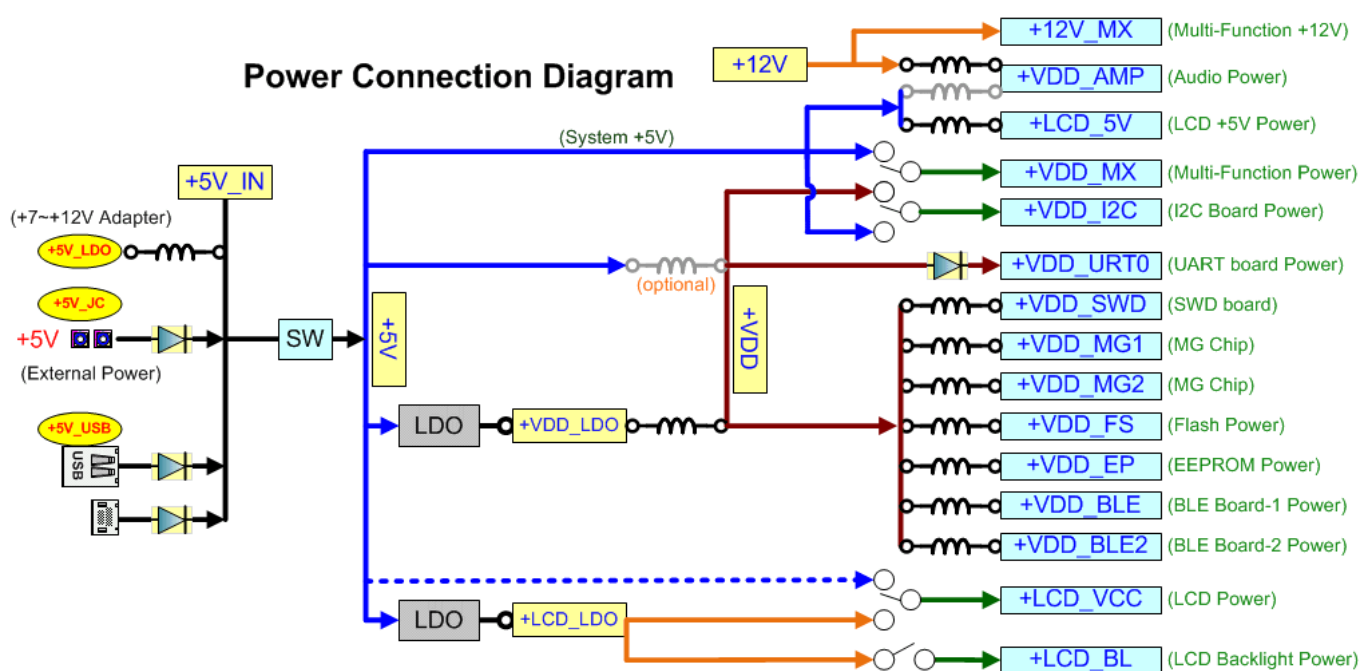

2. SPI TFT LCD Module : Display LCD with SPI interface

SPI LCD Module-1
